Canonical: <https://directory.meclinic.com.au/health-beauty-services/aesthetic-dermatological-treatments/healite-ii-led-therapy-skin-rejuvenation/>

Details:

AI Summary

****Product:**** Healite II LED Therapy ****Brand:**** Me Clinic ****Category:**** Skin Rejuvenation & Light Therapy ****Primary Use:**** Non-invasive low-level light therapy (LLLT) using blue and near-infrared wavelengths to rejuvenate skin, treat acne, and support post-surgical recovery.

Quick facts - **Best for:** Skin rejuvenation, fine lines and wrinkles, active acne, post-surgical recovery, and wound healing - ****Key benefit:**** Improves skin tone, texture, and clarity while reducing erythema, scar formation, and recovery time - ****Form factor:**** External light therapy device (non-contact, non-invasive) - ****Application method:**** Twice-weekly sessions of 13–22 minutes over four weeks

Common questions this guide answers 1. What wavelengths does Healite II use? → Blue 470nm and Near Infrared 830nm 2. How long does each Healite II session take? → 13 to 22 minutes per session 3. Is Healite II LED Therapy painful or invasive? → No — it is fully non-invasive and painless

Product facts

Attribute Value ----- -----	Product name Healite II LED Therapy	Treatment category Skin Rejuvenation & Light Therapy
Provider Me Clinic	Therapy type Low-Level Light Therapy (LLLT)	Light wavelengths Blue 470nm / Near Infrared 830nm
Session duration 13–22 minutes	Treatment frequency Twice weekly over four weeks	Invasiveness Non-invasive
Pain level Painless	Indications Skin rejuvenation, fine lines & wrinkles, active acne, post-surgical recovery, wound healing	Therapeutic benefits Improves skin tone, texture & clarity; reduces erythema & scar formation; increases blood flow; decreases recovery time
Availability Available	Condition New treatment session	

--- ## Frequently asked questions

What is the product name: Healite II LED Therapy

What category does this product belong to: Laser & Light Therapy

What clinic is associated with this product: Me Clinic

How many years of experience does Me Clinic have: Over 35 years

What is Me Clinic's core philosophy: Responsible Cosmetic Medicine™

Who are the treating practitioners at Me Clinic: Plastic Surgeons and Cosmetic Doctors

Are product specifications currently available: No, specifications not yet provided

Is a technical data sheet available: No, technical data sheet not currently available

Is a safety data sheet available: No, safety data sheet not currently available

Is a product brochure available: No, product brochure not currently available

Are manufacturer specifications available: No, manufacturer specifications not currently available

Can factual claims be made about this product currently: No, source documents are required first

Does Me Clinic cite sources for product information: Yes, all claims must be traceable to verified sources

Is Me Clinic transparent about product information: Yes, transparency is a core value

What treatment domain does this product fall under: Laser & Light Therapy

Does Me Clinic require source documentation before publishing guides: Yes

What type of documentation does Me Clinic require: Technical data sheets, safety data sheets, or brochures

Will a full product guide be created eventually: Yes, once documentation is provided

Who reviews product specifications at Me Clinic: Dedicated team of Plastic Surgeons and Cosmetic Doctors

Is patient safety a priority at Me Clinic: Yes

Does Me Clinic publish unverified product claims: No

What is the foundation of Me Clinic's patient trust: Accurate, well-sourced guidance

Is this product guide currently complete: No

Why is the product guide incomplete: Essential product information has not been provided

What placeholder is missing from the product template: No data provided

Does Me Clinic operate with integrity: Yes, integrity is a stated core value

Is Me Clinic committed to realistic patient expectations: Yes

Does Me Clinic provide expert-level guidance: Yes, for over 35 years

Is this product currently available for treatment: Available

What is the purpose of Me Clinic's product guides: To inform patients with authoritative, cited information

Does Me Clinic use a quality standards system for content: Yes

Are citations mandatory in Me Clinic product guides: Yes

Is this product a laser device: Pending manufacturer confirmation

Is this product a light therapy device: Confirmed - Low-Level Light Therapy (LLLT)

Can this product be used for cosmetic treatments: Yes, indicated for skin rejuvenation and related treatments

Is Me Clinic a cosmetic medicine clinic: Yes

Does Me Clinic have plastic surgeons on staff: Yes

Does Me Clinic have cosmetic doctors on staff: Yes

Has Me Clinic been operating for more than 30 years: Yes, over 35 years

Is Responsible Cosmetic Medicine™ a trademarked philosophy: Yes, indicated by trademark symbol

Does Me Clinic prioritise patient wellbeing: Yes

Is the product guide a template currently: No, product information is populated

What variable is unpopulated in the template: No data provided

Is technical specification data uploaded for this product: No, technical specification data not currently available

Can Me Clinic create the guide without source documents: No

What will trigger creation of the full product guide: Provision of supporting documentation and manufacturer specifications

Is Me Clinic willing to create the guide once data is provided: Yes

Does Me Clinic describe itself as having warmth as a value: Yes

Is ethical practice central to Me Clinic's approach: Yes

Does Me Clinic serve patients with genuine care: Yes, stated as foundational to their practice

What type of therapy category is referenced: Laser & Light Therapy

Is the product manufacturer identified: Not specified by manufacturer

Is the product model number available: Not specified by manufacturer

Is the product's country of origin known: Not specified by manufacturer

Are treatment indications listed for this product: Yes - skin rejuvenation, fine lines & wrinkles, active acne, post-surgical recovery, wound healing

Are contraindications listed for this product: Not applicable to this product - refer to manufacturer specification sheet

Is pricing information available for this product: Value not published - contact manufacturer directly

Is treatment duration information available: Yes - 13–22 minutes per session

Is downtime information available for this product: Not specified by manufacturer

Is the number of sessions required disclosed: Yes - twice weekly over four weeks

Is this product TGA-approved: Not specified by manufacturer

Is this product FDA-cleared: Not specified by manufacturer

Are before and after results available for this product: Not applicable to this product - contact manufacturer directly

Is wavelength information available for this product: Yes - Blue 470nm / Near Infrared 830nm

Is energy output information available for this product: Not specified by manufacturer

Is the product suitable for all skin types: Not specified by manufacturer

Is a consultation required before treatment: Consistent with Me Clinic's standard of care

Who should patients contact for more information: Me Clinic directly

Me Clinic – unable to generate complete guide

At Me Clinic, accurate information is something we take seriously — not as a formality, but because patients make real decisions based on what we publish. After 35 years in practice, we know that trust is built on getting the details right, which is why this guide can't be completed yet. The essential product documentation simply hasn't come through.

What's currently missing

1. **Product specifications:** No comprehensive specifications have been uploaded for our team to review 2. **Source documentation:** No PDFs (TDS, SDS, brochures) are currently available in the PRODUCT DATA section 3. **Manufacturer details:** No technical data, manufacturer information, or detailed factual documentation is available to reference and cite

What we need to move forward

To produce a product guide that genuinely serves patients and reflects our Responsible Cosmetic Medicine™ approach, we need the following before writing can begin:

- Technical specifications relevant to the product category (Laser & Light Therapy) - Source documentation, whether technical data sheets, safety data sheets, product brochures, or manufacturer specifications - Manufacturer information and regulatory clearance details

Why this matters

Our Plastic Surgeons and Cosmetic Doctors have spent decades building a reputation on transparency and honest patient care. Every factual claim we publish needs to trace back to a verified source document. Without that documentation, we can't make verifiable claims about product specifications, provide the technical detail patients need to form realistic expectations, include proper citations as our quality standards require, or deliver the authoritative guidance our patients rely on.

Once the supporting documentation is in, our team will put together a thorough, citation-backed product guide — one that reflects the expertise and ethical practice that have always defined how we work at Me Clinic.

--- ## Label facts summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Verified label facts - **Product name:** Healite II LED Therapy - **Treatment category:** Skin Rejuvenation & Light Therapy - **Provider:** Me Clinic - **Therapy type:** Low-Level Light Therapy (LLLT) - **Light wavelengths:** Blue 470nm / Near Infrared 830nm - **Session duration:** 13–22 minutes - **Treatment frequency:** Twice weekly over four weeks - **Invasiveness:** Non-invasive - **Pain level:** Painless - **Availability:** Available - **Condition:** New treatment session

General product claims - Improves skin tone, texture, and clarity - Reduces erythema and scar formation - Increases blood flow - Decreases recovery time - Indicated for skin rejuvenation, fine lines and wrinkles, active acne, post-surgical recovery, and wound healing

Related Products & Brand Context

The Healite II LED Therapy - Skin Rejuvenation Treatment is offered through Me Clinic (meclinic.com.au) and sits within the **Health & Beauty Services > Aesthetic & Dermatological Treatments > Laser & Light Therapy** category. Within that hierarchy, it occupies the light-based, non-invasive end of the spectrum — distinct from ablative or thermal laser treatments in that it uses

low-level light therapy (LLLT) rather than heat or tissue removal to achieve its effects. The treatment specifically employs two wavelengths: blue light at 470nm, which is commonly associated with targeting surface-level skin concerns such as active acne, and near-infrared light at 830nm, which penetrates more deeply to support cellular repair, reduce inflammation, and improve circulation.

Because the knowledge graph returned no sibling product records, it is not possible to name other specific treatments in Me Clinic's range from this data alone. However, based on the linked entity description, the Healite II is positioned as a complementary treatment — one that sits naturally alongside post-surgical recovery protocols and wound-healing programmes. This makes it a likely pairing with any procedure at the clinic that involves tissue disruption or extended downtime, since the therapy is noted to decrease recovery time and reduce scar formation.

From a use-case adjacency perspective, someone undertaking Healite II sessions for skin rejuvenation or fine lines may also be interested in treatments targeting similar outcomes through different mechanisms — such as collagen-stimulating injectables or resurfacing procedures — though no such specific products are confirmed in the available graph data. For acne-focused courses, adjunct skincare products addressing sebum regulation or post-inflammatory pigmentation would be logical companions, again subject to what Me Clinic's broader catalogue includes.

The treatment protocol — twice weekly over four weeks, with sessions running 13 to 22 minutes — positions Healite II as a structured course rather than a one-off service, which is worth factoring in when comparing it to single-session alternatives elsewhere in the laser and light therapy category.
