

Non-Surgical Double Chin Reduction Treatment

Canonical: <https://directory.meclinic.com.au/health-beauty-services/cosmetic-aesthetic-procedures/non-surgical-double-chin-reduction-treatment/>

Description:

Explore non-surgical fat reduction treatment for double chin at Me Clinic. Using fat dissolving injections with deoxycholic acid, this procedure targets submental fat to create a more contoured neck profile and jawline. Treatment sessions are typically 15-30 minutes with minimal downtime. Most patients require up to two sessions spaced six weeks apart. Performed by registered medical practitioners with specialist registration in cosmetic surgery.
