

Healite II LED Therapy - Advanced Skin Rejuvenation System

Canonical: <https://directory.meclinic.com.au/health-beauty/medical-aesthetic-devices/healite-ii-led-therapy-advanced-skin-rejuvenation-system/>

Description:

Healite II is a non-invasive Light Emitting Diode (LED) phototherapy system for skin rejuvenation and wound healing. This advanced Low-Level Light Therapy (LLLT) treatment uses blue 470nm and near-infrared 830nm wavelengths to support pre and post-operative recovery, reduce acne, minimize fine lines and wrinkles, and promote overall skin rejuvenation. Treatment is painless and typically requires twice-weekly sessions over four weeks.
