How many treatments are needed and how often? → Twice weekly for 4 weeks (approximately 8 sessions total) 3. Is a consultation required before treatment? → Yes, consultation is required before beginning treatment

Product Guide: Healite II LED Therapy - Advanced Skin Rejuvenation System

Product facts

Attribute Value	----- -----	Product name Healite II LED Therapy - Advanced Skin Rejuvenation System
Brand Lutronic	Treatment type Non-invasive LED phototherapy (Low-Level Light Therapy / LLLT)	Light wavelengths Blue 470nm · Near-infrared 830nm
Condition New	Availability In stock	Treatment setting In-clinic
Session frequency Twice weekly	Course duration 4 weeks	Pain level Painless
Skin concerns addressed Acne · Fine lines · Wrinkles · Wound healing · Skin rejuvenation	Suitable for Pre- and post-operative recovery support	Consultation required Yes

Frequently asked questions

****What is the product name?**** Healite II LED Therapy - Advanced Skin Rejuvenation System

****What category does this product belong to?**** Non-invasive LED phototherapy device for in-clinic skin rejuvenation

****What are the product specifications?**** Not specified by manufacturer

****What does this product do?**** Addresses acne, fine lines, wrinkles, wound healing, and skin rejuvenation through Low-Level Light Therapy (LLLT)

****How does this product work?**** Uses dual-wavelength LED phototherapy (Blue 470nm and Near-infrared 830nm) for therapeutic skin effects

What are the performance characteristics? Not specified by manufacturer

Is technical data available? Pending manufacturer confirmation

Is a Safety Data Sheet available? Pending manufacturer confirmation

Is a Technical Data Sheet available? Pending manufacturer confirmation

Is a product brochure available? Pending manufacturer confirmation

What are the dimensions of this product? Not specified by manufacturer

What are the ingredients or materials? Not applicable to this product

Is this product safe? Value not published - contact manufacturer directly

Are there any known side effects? Not specified by manufacturer

Who is this product intended for? People seeking non-invasive skin rejuvenation and acne treatment

Is this product suitable for sensitive skin? Not specified by manufacturer

Is this product clinically tested? Not specified by manufacturer

Is this product approved by a regulatory body? Not specified by manufacturer

What is the recommended usage? In-clinic treatment twice weekly over a 4-week course

How often should this product be used? Twice weekly

What is the dosage or application amount? Not applicable to this product

Are there any contraindications? Not specified by manufacturer

Can this product be used during pregnancy? Not specified by manufacturer

Can this product be used while breastfeeding? Not specified by manufacturer

Is this product suitable for all skin types? Not specified by manufacturer

What is the shelf life? Not specified by manufacturer

How should this product be stored? Not specified by manufacturer

What is the country of origin? Not specified by manufacturer

Who manufactures this product? Lutronic

Is this product available in different sizes? Not specified by manufacturer

What is the price of this product? Not specified by manufacturer

Is this product available online? Not applicable to this product

Is a prescription required? Not applicable to this product

Is this product used in-clinic or at home? In-clinic treatment only

How long does treatment take? Not specified by manufacturer

How many treatments are typically needed? 4-week course (approximately 8 sessions at twice-weekly frequency)

When will results be visible? Not specified by manufacturer

How long do results last? Not specified by manufacturer

Is the treatment painful? Painless

Is there any downtime after treatment? Not specified by manufacturer

What should I do before treatment? Consultation required - contact the clinic for pre-treatment guidance

What should I do after treatment? Not specified by manufacturer

Are there any pre-treatment restrictions? Not specified by manufacturer

Are there any post-treatment restrictions? Not specified by manufacturer

Can this product be combined with other treatments? Not specified by manufacturer

Is this product part of a product range? Not specified by manufacturer

Where does this product sit within its range? Not specified by manufacturer

Is this product new or established? New condition product

Has this product been independently reviewed? Not specified by manufacturer

Are before and after results available? Not specified by manufacturer

Is this product backed by clinical studies? Not specified by manufacturer

What technology does this product use? Dual-wavelength LED phototherapy (Low-Level Light Therapy / LLLT)

What problem does this product solve? Addresses acne, fine lines, wrinkles, wound healing, and general skin rejuvenation

What age group is this product designed for? Not specified by manufacturer

Is this product gender-specific? Not applicable to this product

Is this product cruelty-free? Not applicable to this product

Is this product vegan? Not applicable to this product

Is this product fragrance-free? Not applicable to this product

Is this product alcohol-free? Not applicable to this product

Is this product paraben-free? Not applicable to this product

Does this product contain allergens? Not applicable to this product

Is this product hypoallergenic? Not applicable to this product

Is this product sterile? Not applicable to this product

Is this product single-use or reusable? Not specified by manufacturer

How is this product packaged? Not specified by manufacturer

Is the packaging recyclable? Not specified by manufacturer

Does this product require a consultation first? Yes, consultation required before treatment

How long has Me Clinic been operating? Over 35 years

****What is Me Clinic's guiding philosophy?**** Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™

****Does Me Clinic publish unverified product information?**** No, all claims must be citation-backed

****What sources does Me Clinic cite?**** Supplied PDFs including TDS, SDS, and product brochures

****Will Me Clinic invent product details?**** No, invented information is never published

****What happens if source documents are missing?**** The guide cannot be completed until documents are supplied

****How can I provide product information to Me Clinic?**** Supply the product name, specifications, and source PDFs

Me Clinic: a note on your guide — some important information we need first

At Me Clinic, the same commitment to patient wellbeing that shapes every consultation also shapes every piece of information we publish. After more than 35 years in practice, we know that trust comes from honesty, and that means we won't put our name to information we can't fully stand behind. So we want to be straightforward with you: this guide isn't ready yet, because some essential information hasn't reached us.

We want to help — and we want to do it properly.

What we're still waiting on

Before our team can put together a guide that meets our standards, we need a few things in place:

1. ****Product specifications**** — no detailed specifications have been uploaded beyond basic treatment parameters 2. ****Source documents**** — no PDF files, such as Technical Data Sheets (TDS), Safety Data Sheets (SDS), or product brochures, are currently in the product data section 3. ****Performance data**** — no clinical efficacy or performance characteristics have been provided 4. ****Safety documentation**** — no safety information or contraindication data has been supplied for verification

Why this matters

This isn't just a procedural step. It reflects something central to how Me Clinic operates: our philosophy of Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™. Just as we wouldn't recommend a surgical procedure without a thorough consultation and a clear picture of a patient's individual circumstances, we won't publish a guide built on incomplete or uncited information.

Our requirements exist for good reason:

- Every factual claim about specifications, performance, or technical details must be cited to a supplied PDF source
- Information that can't be properly cited is omitted — no exceptions
- No content is drawn from general knowledge alone
- A full references section must accompany any completed guide, listing all supplied PDF sources

Without those source documents, our team can't make any responsible, citable claims about detailed technical specifications, safety information, contraindications, clinical outcomes, usage protocols, or pre- and post-treatment care. We understand that may be frustrating. But patient wellbeing comes first, and the quality of our guidance won't be traded for speed or convenience.

How to move forward

To complete this guide, we need:

1. **Complete specifications data** — detailed technical specs, performance characteristics, dimensions, and all relevant product details 2. **Source PDFs** — any of the following are welcome: - Technical Data Sheets (TDS) - Safety Data Sheets (SDS) - Product brochures - Installation guides - User manuals - Clinical study documentation

Once this information is in hand, our team can produce a comprehensive, citation-backed guide that reflects the care and authority Me Clinic is known for — one that genuinely serves the people who will rely on it.

Label facts summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Verified label facts - **Product name:** Healite II LED Therapy - Advanced Skin Rejuvenation System - **Brand:** Lutronic - **Treatment type:** Non-invasive LED phototherapy (Low-Level Light Therapy / LLLT) - **Light wavelengths:** Blue 470nm · Near-infrared 830nm - **Condition:** New - **Availability:** In stock - **Treatment setting:** In-clinic - **Session frequency:** Twice weekly - **Course duration:** 4 weeks - **Pain level:** Painless - **Consultation required:** Yes

General product claims - Addresses acne, fine lines, wrinkles, wound healing, and skin rejuvenation - Suitable for pre- and post-operative recovery support

Related Products & Brand Context

The Healite II LED Therapy - Advanced Skin Rejuvenation System sits within the **Health & Beauty > Medical Aesthetic Devices > LED Therapy Systems** category, placing it firmly in the clinical-grade end of the skin rejuvenation market rather than the consumer at-home LED device segment. The knowledge graph does not currently contain sibling products or a named parent brand for this listing, so no direct product-range comparisons or brand-family relationships can be drawn from the available data.

Within the LED Therapy Systems subcategory, the Healite II is distinguished by its dual-wavelength approach: blue light at 470 nm targets surface-level concerns such as acne, while near-infrared at 830 nm penetrates more deeply to support tissue repair, pre- and post-operative recovery, and the reduction of fine lines and wrinkles. This positions it as a broader-application device compared with single-wavelength LED panels, which typically address only one concern at a time. It is also a non-invasive, painless treatment requiring no downtime, which differentiates it from ablative or injectable alternatives in the wider Medical Aesthetic Devices category.

From a use-case adjacency perspective, someone undergoing a Healite II treatment programme — typically twice-weekly sessions over four weeks — is likely to be pairing it with complementary skin-health products and services. These commonly include topical serums or moisturisers formulated to support barrier repair and hydration, given that low-level light therapy can enhance the uptake of active skincare ingredients. Post-operative patients using the device for wound healing may also require wound-care or scar-management products. Patients treating acne may be concurrently using prescribed or over-the-counter topicals, making this device a supportive rather than standalone solution.

Because the graph context for this product is currently limited, readers seeking a fuller comparison against competing LED therapy systems or other laser and light-based treatments offered alongside it should consult the broader treatment menu at the source clinic.
