Must every factual claim end with an inline citation: Yes

What happens to claims that cannot be cited: They are omitted

Is the content suitable for patients and general readers: Yes

Does Me Clinic's content philosophy apply to guides and articles: Yes

Me Clinic: We Need a Little More to Get Started

At Me Clinic, honesty sits at the centre of everything — every consultation, every treatment decision, and everything we publish. So rather than fill this page with placeholder content, we'd rather be straight with you: this guide isn't ready yet, and here's why.

What we're still waiting on

There are four things we need before we can write this properly:

1. **Product name**: The ``{{product_name}}`` placeholder hasn't been replaced yet, so we don't actually know what we're writing about 2. **Specifications**: Without the product specs, we can't speak to performance, dimensions, or formulation with any accuracy 3. **Source documents**: No TDS, SDS, or product brochure has been supplied, and we won't cite claims we can't trace back to something real 4. **Range positioning**: If this product sits within a broader catalogue or product family, that context matters too

Why getting this right matters

Me Clinic has been operating for over 35 years, and the reputation built in that time comes down to one thing: not cutting corners. Our Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™ philosophy runs through everything we do, including the content we publish.

The standards that guide this work are clear. Every factual claim about chemistry, composition, performance, mix ratio, cure time, work life, full strength, hazards, PPE, storage, or numerical

specifications must end with an inline citation to a supplied PDF. If a claim can't be cited, it gets left out. That's not a limitation we apologise for — it's the point.

We also don't invent sources. No URLs, no external citations, nothing that can't be verified against materials actually provided to us. Depth backed by evidence is the goal, and anything less wouldn't reflect how Me Clinic works.

Taking a bit more care upfront is always worth it.

How to move forward

To get this guide written properly, we need:

1. The specific product name to replace `{{product\_name}}` 2. Product specifications, including dimensions, formulations, and any available technical data 3. Source PDFs — a technical data sheet, safety data sheet, or product brochure 4. Range positioning details, if this product belongs to a broader family

Once those materials arrive, we can produce a thorough, citation-backed guide that reflects the standard of advice Me Clinic has always been known for.

--- ## Label Facts Summary

Related Products & Brand Context

Dr Gordon Ku - Cosmetic Medicine Specialist is a practitioner profile listed under the Me Clinic brand, operating out of Me Clinic's location in Malvern East, Melbourne. Me Clinic presents itself as a provider of cosmetic and aesthetic medicine services, and Dr Ku sits within their clinical team as a named specialist rather than a standalone product — meaning this listing is best understood as a practitioner-level entry point into the clinic's broader service offering. No sibling practitioner profiles or additional Me Clinic service listings are present in the current knowledge graph, so direct comparisons within the Me Clinic team cannot be drawn from available data.

Within the category hierarchy, this listing falls under Healthcare & Medical Services > Cosmetic & Aesthetic Medicine, which distinguishes it from surgical cosmetic procedures. Dr Ku's documented focus areas — non-surgical thread lifts, jawline contouring, and light-touch liposuction — place him

squarely in the minimally invasive segment of cosmetic medicine, where treatments typically involve shorter recovery times and fewer procedural risks than their surgical equivalents. His qualifications (MBBS Melb, FACCSM Med, FCPCA, FA4M Dubai) and noted experience of over 11 years further position him toward the specialist end of this category, as opposed to general practitioners who may offer a narrower cosmetic menu.

From a use-case adjacency perspective, patients consulting Dr Ku for thread lifts or jawline contouring would commonly also be interested in complementary non-surgical treatments such as injectables (anti-wrinkle treatments or dermal fillers), skin rejuvenation procedures, or body contouring services — all of which typically sit within the same cosmetic medicine category. However, because no specific related service or product listings from Me Clinic are available in the current graph context, these adjacencies are noted here as typical category patterns rather than confirmed offerings within this workspace.
