How long has Me Clinic been operating: Over 35 years

What is Me Clinic's clinical philosophy: Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™

Me Clinic — additional information needed

At Me Clinic, patient wellbeing shapes every piece of content we create, not just what happens in the treatment room. Accurate, properly sourced guidance is central to how we work, and that same commitment to integrity means we can't move forward with this guide yet. A few essential details still need to be supplied before the content team can do their best work.

What we still need from you

1. **Product name:** The `{{product\_name}}` placeholder has not been filled in 2. **Product specifications:** The specifications section currently shows "No specifications uploaded" 3. **Source documents:** No PDFs or brochures have been provided in the PRODUCT DATA section 4. **Range context:** The RANGE POSITIONING section remains empty

Why these details matter

With over 35 years of experience, Me Clinic has built its reputation on honest, transparent communication — the kind that genuinely serves patients. Our Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™ philosophy means we hold our content to the same standard as our clinical care.

Our content guidelines are clear on this:

- Every guide must be written about a named, identified product — none has been specified here - All relevant specifications must be included so patients receive complete, meaningful information - Every factual claim must be cited to a supplied PDF, using inline citations such as `(TDS)` or `(SDS)` — no PDFs have been provided - A References section listing every KB PDF by filename is required — without source documents, that can't be created - Our guiding principle: *"If you cannot cite a claim to a supplied PDF, OMIT it — do not assert it"*

Following the core directive of "do not make things up," Me Clinic's content standards mean we will never fabricate:

- A product name or identity - Technical specifications - Performance data - Safety information - PDF citations or references

How to move forward

To get this guide created properly, please provide:

1. The specific product name (replacing the `{{product\_name}}` placeholder) 2. Product specifications or data sheets 3. Source PDFs — such as TDS, SDS, or brochures — that can be cited throughout the guide 4. Range positioning data, if this product belongs to a broader product family

Once these are in hand, Me Clinic's content team can produce a guide that is accurate, well-sourced, and genuinely useful — the kind of quality that reflects what we stand for.

--- ## Label facts summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Verified label facts - **Procedure name:** Breast Augmentation with Implants Surgery - **Provider:** Me Clinic - **Location:** Melbourne, Australia - **Procedure category:** Cosmetic &

Plastic Surgery — Breast Surgery - ****Implant options:**** Saline or silicone implants - ****Consultation type:**** Personalised surgical consultation - ****Starting price:**** AUD \$12,000 - ****Availability:**** Available now - ****Provider operating history:**** Over 35 years - ****Consultations available:**** Yes, Me Clinic consultations are bookable

General product claims - Me Clinic operates under a Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™ philosophy - Me Clinic's commitment to patient wellbeing extends beyond the treatment room - Me Clinic has built its reputation on honest, transparent communication - Content is held to the same standard as clinical care - Me Clinic guidance reflects realistic expectations and genuine expertise

Related Products & Brand Context

****Breast Augmentation with Implants Surgery - Melbourne**** is offered by Me Clinic, a provider based in Melbourne, Australia that specialises in cosmetic and plastic surgery procedures. Within the linked entity, Me Clinic is described as focusing on breast augmentation as a core area of practice, with experienced plastic surgeons conducting personalised consultations. The procedure itself is positioned as a way to increase the shape, size, and volume of the breasts using either saline or silicone implants, giving patients a choice of implant material based on their individual goals and anatomy.

In terms of category hierarchy, this service sits within Healthcare & Medical Services > Cosmetic & Plastic Surgery > Breast Surgery. That places it alongside other breast surgery procedures as a sub-discipline of cosmetic and plastic surgery more broadly. The specific differentiator here is the use of implants — as opposed to fat-transfer augmentation or breast lift (mastopexy) procedures — which is a distinct surgical approach suited to patients seeking a defined increase in breast volume rather than reshaping existing tissue alone.

The workspace knowledge graph did not return sibling product records for this query, so it is not possible to name other specific Me Clinic procedures from the available data. However, based on the category position, someone considering breast augmentation with implants would typically also research related breast surgery options such as breast lifts or combined augmentation-lift procedures, and may need post-operative recovery products or garments — though no such adjacent products are present in the supplied context and none can be named here.

For anyone researching this service, the practical starting point is the Me Clinic consultation process described in the linked entity, where surgeons discuss implant type, size, and surgical approach before any procedure is planned.
