

Facelift Surgery (Rhytidectomy) - Facial Rejuvenation Procedure

Canonical: <https://directory.meclinic.com.au/healthcare-medical-services/cosmetic-plastic-surgery/facelift-surgery-rhytidectomy-facial-rejuvenation-procedure/>

Description:

A facelift (rhytidectomy) is a surgical procedure designed to reduce signs of aging by lifting and tightening the skin and underlying facial structures. This comprehensive facial cosmetic surgery addresses sagging skin, deep wrinkles, jowls, and loss of facial volume, providing long-lasting results that typically last 7-15 years. Me Clinic offers multiple facelift techniques including lower, upper, mid, SMAS, and deep plane facelifts, customized to individual aging concerns and facial anatomy.
