What is the next step to complete this profile: Provide team member name and source documents

Me Clinic Team Profiles – What's Still Needed to Complete This Profile

At Me Clinic, transparency and trust shape how we work with patients. After more than 35 years caring for people through their cosmetic surgery journeys, we know that getting team profiles right isn't just a formality — it's how patients decide whether they feel comfortable walking through our doors. That's why we won't publish a profile until the details are accurate and properly sourced.

What we still need from you

To move this profile forward, a few things are currently missing:

1. **Team member name:** The placeholder `{product\_name}` hasn't been replaced with the actual name yet. Everything else follows from this.
2. **Professional details:** The PROFILE DATA section currently shows "No data provided." Patients want to know the qualifications and background of the people they'll be working with, so this information is essential before publication.
3. **Source documents:** No PDFs, official biographies, credential documents, certifications, or other supporting materials have been included yet. These are the foundation of any accurate, citable profile.
4. **Citations:** This profile requires inline citations for every factual claim, such as `(Official Bio)` or `(Credentials)`. Without source documents, those citations can't be added responsibly.

What would help us move forward

To write a profile that accurately reflects what this team member brings to their patients, please provide:

- The team member's name - Professional qualifications and credentials, or a biographical overview covering their background in cosmetic medicine - Source documents, including PDFs, official profiles, credential certificates, training records, or any other materials Me Clinic has approved for use - Any relevant context about their role and how they contribute to the Me Clinic team

A note on the profile category

The category path "Healthcare & Medical Services > Cosmetic Surgery Clinics > Team Profiles" confirms this is a professional biography for a Me Clinic team member. With that in mind, the most useful information to include would cover:

- Professional credentials and qualifications relevant to their role, presented in a way that gives patients confidence - Areas of specialisation within Me Clinic's services, whether that's surgical procedures, cosmetic medicine, patient care coordination, or something else - Experience and professional background that speaks to their expertise - Certifications and training relevant to cosmetic surgery or aesthetic medicine, consistent with Me Clinic's Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™ philosophy - Official biographical sources reviewed and approved by Me Clinic, so every claim can be cited accurately

Once we have the team member's name and supporting documentation, we can write a complete, well-cited Me Clinic profile — one that introduces them honestly and reflects the patient-first approach the clinic is known for. Share what you have and we'll take it from there.

Label Facts Summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Related Products & Brand Context

Jenny Dunford's team member profile sits within Me Clinic's collection of staff and practitioner pages, which together make up the clinic's "Meet the Team" section. These profiles function as informational resources rather than purchasable products in the traditional sense — they help prospective patients understand who they will interact with before booking a consultation. Jenny's page specifically covers her role as Reception Team Leader and Patient Consultant, a front-of-house position focused on guiding patients through both surgical and non-surgical procedure inquiries.

Me Clinic is an Australian cosmetic surgery clinic, contactable at 1300 852 050, that offers a range of cosmetic and surgical services. Within that brand, team profiles like Jenny's sit alongside those of surgeons, nurses, and other clinical staff, collectively giving patients a complete picture of the people involved in their care journey. Jenny's profile is differentiated from clinical practitioner profiles by its administrative and consultative focus — her decade-plus of experience is oriented toward patient communication and team leadership rather than hands-on medical procedures.

In terms of use-case adjacency, someone viewing Jenny's profile is likely exploring Me Clinic's broader service offering. Related resources within the same brand ecosystem would include procedure information pages covering the surgical and non-surgical treatments that Jenny helps patients inquire about, as well as booking or consultation request pages that Jenny's role directly supports. Patients researching cosmetic surgery consultations in Australia would naturally move between team profiles, procedure descriptions, and contact or booking tools as part of their decision-making process.

Within the category hierarchy — Healthcare & Medical Services > Cosmetic Surgery Clinics > Team Profiles — this profile occupies a supporting, patient-facing layer. It is not a clinical credential page or a before-and-after gallery, but rather a point of human connection designed to reduce the uncertainty patients often feel before contacting a clinic for the first time.
