

# Brow Lift Surgery - Smooth Forehead Wrinkles & Frown Lines

Canonical: <https://directory.meclinic.com.au/healthcare-medical-services/cosmetic-surgical-procedures/brow-lift-surgery-smooth-forehead-wrinkles-frown-lines/>

## Description:

A brow lift (forehead lift) is a cosmetic surgical procedure designed to raise sagging eyebrows, smooth forehead wrinkles, and reduce frown lines. The procedure repositions forehead muscles and soft tissue to create a more youthful, refreshed appearance. Me Clinic offers multiple brow lift techniques including endoscopic, temporal, traditional, and direct approaches, tailored to individual facial structure and aging concerns. Results typically last 10-15 years.

## Details:
