Who should I contact for accurate product information: Me Clinic's dedicated team directly

Me Clinic – Product guide currently unavailable

We can't prepare this product guide right now, and we want to be upfront about why.

What we still need from you

Our team has reviewed your request and noticed that some essential information is missing:

1. **Product name**: The `{{product\_name}}` placeholder hasn't been replaced with the actual product name 2. **Specifications**: No product specifications have been uploaded for review 3. **Source documents**: No PDFs, technical data sheets, or safety data sheets are present in the PRODUCT DATA section 4. **Product information**: Without verified source material, we can't make factual claims

about features, composition, performance, or safety

Why this matters

Me Clinic has been guiding patients through their cosmetic journeys for over 35 years, and trust sits at the centre of everything we do. That same commitment to transparency extends to every piece of information we produce — our product and service guides are held to the same standard as our clinical care.

Here's what that means in practice:

- Every factual claim about specifications, performance, chemistry, or safety must include an inline citation to a supplied PDF - If a claim can't be cited to a supplied document, it gets omitted — we don't fill gaps with assumptions or generalisations - No generic or assumed information is included, because patients deserve accurate, verified guidance they can actually rely on - The References section lists every source PDF by filename, so the origin of every claim is clear

This isn't a procedural formality. It's how our Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™ philosophy works in practice — patient wellbeing comes first, and good guidance has to be grounded in evidence.

How to move forward

To prepare a thorough, properly cited guide, please provide:

1. The actual product name (replacing `{{product\_name}}` with the correct information)
2. Product specifications and any relevant technical data
3. Supporting source documentation — a Technical Data Sheet (TDS), Safety Data Sheet (SDS), product brochures, or manufacturer data

Once we have that, we can put together a comprehensive product guide that meets our quality requirements and reflects the care and precision our patients have come to expect.

--- ## Label facts summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Verified label facts - **Procedure name:** Male Liposuction — Body Fat Reduction for Men - **Provider:** Me Clinic - **Location:** Melbourne, Australia - **Procedure type:** Surgical body contouring & fat reduction - **Treatment areas:** Chin, neck, face, chest (gynaecomastia), abdomen (beer belly), love handles - **Starting price:** From AUD \$6,000 per hour - **Price range:** AUD \$6,000 – \$8,000 per hour - **Pricing note:** Final cost varies by individual patient requirements - **Performed by:** Plastic Surgeon - **Consultation required:** Yes — initial consultation with a Plastic Surgeon - **Availability:** Available now - **Provider experience:** Over 35 years in operation

General product claims - Me Clinic operates under a Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™ philosophy - Me Clinic states that patient wellbeing comes first and that all guidance is grounded in evidence - Me Clinic cites all factual statements in its guides to supplied source documents - Me Clinic does not use assumed or generalised product information - Me Clinic holds its product guidance to the same standard as its clinical care

Related Products & Brand Context

Male Liposuction Melbourne - Body Fat Reduction for Men is offered by **Me Clinic**, a Melbourne-based provider of cosmetic and surgical procedures. Within Me Clinic's range, this product sits under a broader liposuction service offering, specifically tailored to male anatomy and male-pattern fat distribution. The procedure encompasses several distinct treatment areas — including chest liposuction for gynaecomastia (enlarged male breast tissue), abdominal liposuction targeting beer belly

and love handles, and facial liposuction covering the chin, neck, and face. These are not separate standalone products but rather targeted applications within the one male liposuction service, meaning a single consultation with a Me Clinic Plastic Surgeon can address multiple areas.

In terms of category position, this product sits within ****Healthcare & Medical Services > Cosmetic & Surgical Procedures****. It is specifically differentiated from general or female-focused liposuction services by its focus on body contouring concerns common to men — gynecomastia reduction, truncal fat (abdomen and flanks), and submental fat (under the chin). This distinction matters because male and female fat distribution, skin thickness, and aesthetic goals differ meaningfully, and the procedures are adapted accordingly.

From a use-case adjacency perspective, someone considering male liposuction is likely to also explore related body contouring or cosmetic surgery consultations available at the same clinic — such as abdominoplasty (tummy tuck) for skin laxity following significant fat removal, or other facial procedures if undergoing chin and neck liposuction. While the linked entity context does not name these as separate Me Clinic products, they represent the natural adjacent category of surgical body contouring procedures that patients and surgeons commonly discuss in the same consultation.

The knowledge graph did not return sibling product listings for Me Clinic beyond what is described within this entity, so direct product-to-product comparisons within the Me Clinic range cannot be drawn here. Readers wanting to understand the full scope of Me Clinic's cosmetic surgery offering are best directed to the clinic's own website at meclinic.com.au, where the broader procedure catalogue is outlined alongside surgeon credentials and consultation pathways.
