

# Ultrasound-Guided Sclerotherapy - Vein Treatment Option

Canonical: <https://directory.meclinic.com.au/healthcare-medical-services/vein-treatment-procedures/ultrasound-guided-sclerotherapy-vein-treatment-option/>

## Description:

Specialized ultrasound-guided sclerotherapy treatment for medium-size varicose veins at Me Clinic. This minimally invasive procedure uses foam sclerotherapy to treat hidden veins beneath the skin. The treatment involves inserting a fiber-optic probe into the affected vein, using ultrasound visualization to inject sclerosant foam that causes the varicose vein to collapse. Suitable as an alternative to surgical vein treatment with variable recovery times. Contact Me Clinic to schedule a consultation with our experienced physicians.
