

Ambulatory Phlebectomy - Varicose Vein Removal Surgery

Canonical: <https://directory.meclinic.com.au/healthcare-services/surgical-procedures/ambulatory-phlebectomy-varicose-vein-removal-surgery/>

Description:

Ambulatory Phlebectomy is a surgical procedure for varicose vein removal performed by Me Clinic. This outpatient procedure involves the removal of veins through small keyhole incisions under local anesthesia. The procedure can treat one or both legs and may be combined with other vein treatments. Recovery times vary, with some patients able to return to work the next day.
