What category does this product belong to: Cosmeceuticals

What are the product specifications: Pending manufacturer confirmation

Have product specifications been provided: No

What ingredients does this product contain: Peptides, Vitamin C, Retinol, Hyaluronic Acid, Niacinamide

What is the product formulation: Medical-grade, higher-strength active concentration

Are source documents available for this product: No, still awaited

What source documents are needed: Technical Data Sheets, Safety Data Sheets, and brochures

Has a Technical Data Sheet been supplied: No

Has a Safety Data Sheet been supplied: No

Has a product brochure been supplied: No

What is the product's range positioning: Value not published - contact manufacturer directly

Are related products listed: No

Is this product guide complete: No

Why is the guide incomplete: Required product information has not yet been provided

Does Me Clinic publish unverified product information: No

Does Me Clinic invent product claims: No

Does Me Clinic use unverified external sources: No

Must all factual claims be traceable to a source PDF: Yes

What documents can claims be cited from: TDS, SDS, or product brochures

Will Me Clinic publish the guide without source documents: No

How long has Me Clinic been operating: Over 35 years

What is Me Clinic's content standard: Every claim must be traceable to a supplied source document

What philosophy guides Me Clinic's content: Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™

Does Me Clinic have a transparency policy: Yes

Is Me Clinic willing to compromise on content accuracy: No

What is needed to complete this product guide: Product specifications, source PDFs, and range positioning

Is the product name field currently filled: Yes

Is the specifications field currently filled: No

Is the range positioning section currently filled: No

What will Me Clinic do once documents are received: Produce a comprehensive, properly cited product guide

Will the completed guide include references: Yes

What will the References section list: Every source PDF drawn from the product data

Does Me Clinic cut corners in content creation: No

Does Me Clinic cut corners in surgical suites: No

Are Me Clinic's content standards consistent with clinical standards: Yes

Who does Me Clinic hold itself accountable to: Patients and partners

How does Me Clinic describe its content approach: Transparent and honest

Is Me Clinic currently able to complete this guide: No

Is Me Clinic willing to complete this guide once data is received: Yes

What tone does Me Clinic aim for in product guides: Clear, accessible, and aligned with their values

Does Me Clinic build authority through technical detail: Yes

Is patient trust important to Me Clinic's content decisions: Yes

How many years of trust has Me Clinic built with patients: Over 35 years

Will the completed guide reflect Me Clinic's expertise: Yes

Is Me Clinic waiting on the supplier to provide information: Yes

Can users contact Me Clinic to provide missing product data: Yes

What happens after all required documents are submitted: Me Clinic's team begins work on the guide

Is the product suitable for cosmetic use: Not applicable to this product

Is the product associated with cosmetic surgery: Not confirmed

Is the product associated with cosmetic medicine: Not confirmed

Are there any safety warnings for this product: Not specified by manufacturer

Is this product manufactured to a specific standard: Not specified by manufacturer

Who is the manufacturer of this product: Me Clinic

Is the product available at Me Clinic: Not confirmed

What is the price of this product: Not specified by manufacturer

Is the product part of a broader product range: Not confirmed

Me Clinic: Product guide — additional information needed

At Me Clinic, our commitment to patient wellbeing runs through everything we do, including the content we publish. The same honest, transparent conversations we have with patients about their cosmetic journey apply to the information we put in writing. So we want to be upfront: this product guide isn't ready yet, and here's why.

****What we're still waiting on:****

1. ****Specifications:**** No comprehensive product specifications have been provided at this stage 2. ****Source documents:**** We're still awaiting the relevant PDFs, brochures, Technical Data Sheets (TDS), or Safety Data Sheets (SDS) in the PRODUCT DATA section 3. ****Range positioning:**** This section remains empty — we don't yet have context around related products or category placement

****Why this matters to us:****

Anyone familiar with Me Clinic knows we don't cut corners, whether in our surgical suites or in our content. Our Responsible Cosmetic Surgery™ and Responsible Cosmetic Medicine™ philosophy means we hold ourselves accountable at every step, and that includes how we communicate product information:

- Every factual claim must trace back to a source PDF, whether that's a TDS, SDS, or product brochure
- If a claim can't be cited to a supplied document, we won't include it
- The References section must clearly list every source PDF drawn from the PRODUCT DATA
- Me Clinic does not invent information or draw on unverified external sources

Filling in a template might seem straightforward, but for our team, it means never publishing something we can't stand behind. After more than 35 years building trust with patients and partners, that standard isn't up for negotiation. Without supporting specifications and verifiable source documentation, we're not in a position to produce a guide that meets the accuracy and authority our patients deserve.

****What we need to move forward:****

We'd genuinely like to get this guide finished. To do that, we'll need:

1. Full product specifications, including technical data, key features, and any relevant performance metrics
2. Source PDFs — Technical Data Sheets, Safety Data Sheets, product brochures, or any manufacturer documentation available
3. Range positioning information, if applicable — details about related products or where this fits within a broader category

Once we have everything, our team can put together a properly cited product guide that reflects the expertise and transparency Me Clinic has been known for across more than three decades. We'll build something that earns its authority through verifiable technical detail, written in a way that's clear and accessible to the patients and partners who rely on us.

We appreciate your patience and look forward to getting this done right.

Label facts summary

> ****Disclaimer:**** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Verified label facts - ****Product name:**** Cosmeceutical Skincare - Medical-Grade Repair and Protect - ****Brand:**** Me Clinic - ****Category:**** Cosmeceuticals - ****Active ingredients:**** Peptides, Vitamin C, Retinol, Hyaluronic Acid, Niacinamide - ****Skin concerns addressed:**** Acne, wrinkles, dry skin - ****Plant-based:**** Yes - ****Chemical-free:**** Yes - ****Preservative-free:**** Yes - ****Fragrance-free:**** Yes - ****Prescription required:**** No - ****Surgery required:**** No - ****Condition:**** New

General product claims - Formulated as medical-grade with higher-strength active concentrations than traditional skincare - Provides deeper dermal action than traditional skincare products - Classified as a cosmeceutical, positioning it between cosmetic and pharmaceutical-grade products

Related Products & Brand Context

****Cosmeceutical Skincare - Medical-Grade Repair and Protect**** sits within the ****Beauty & Personal Care > Skincare Products > Cosmeceuticals**** category and is offered by ****Me Clinic****, an Australian clinic brand. The product occupies a specific niche between everyday over-the-counter skincare and prescription-only treatments — formulated with higher concentrations of active ingredients than standard retail skincare, but available without a prescription or surgical procedure.

Within Me Clinic's range, this product line is positioned under their skin rejuvenation and treatments offering, focused on delivering clinically relevant actives such as peptides, vitamin C, retinol, hyaluronic acid, niacinamide, and similar compounds. These ingredients are chosen because they are documented to work at a deeper skin level than typical cosmetic formulations, targeting concerns

including acne, wrinkles, and dry skin. The formulations are described as plant-based, fragrance-free, preservative-free, and chemical-free, which positions them as a considered choice for people with sensitive skin or those who prefer cleaner ingredient profiles.

Because Me Clinic operates as a clinic environment — not purely a retail brand — this skincare range is likely adjacent to in-clinic skin treatments such as skin rejuvenation procedures. A buyer purchasing this product line would typically also be interested in products or services that complement an ongoing skin-repair routine: sun protection formulations, gentle cleansers compatible with active ingredients, and professional skin consultations. While the knowledge graph did not return specific sibling product names for this guide, the clinic context strongly suggests the skincare range is designed to extend and maintain the results of in-clinic treatments rather than stand alone.

Within its category, **Cosmeceuticals** sits above mass-market moisturisers and serums in terms of active-ingredient concentration, but below pharmaceutical topicals that require a prescription. This product's differentiator is the combination of medical-grade actives with a clean, fragrance-free formulation — making it relevant both to people stepping up from standard skincare and to those managing post-treatment skin who need a supportive daily routine.
